# Can History of Science teach us how to make Science?

- Introduction (What is History of Science?).
- Externalist approach.
- Some important points.
- Conclusion.

# What History of Science is not...

- History of individuals.

# What History of Science is not...

- History of individuals.
  - History of IDEAS.

# What History of Science is not...

- History of individuals.
  - History of IDEAS.
- Amateurish.

# What History of Science is not...

- History of individuals.
  - History of IDEAS.
- Amateurish.
  - Requires profound knowlege of subject.

# What History of Science is not...

- History of individuals.
  - History of IDEAS.
- Amateurish.
  - Requires profound knowlege of subject.
- Self-contained.

# What History of Science is not...

- History of individuals.
  - History of IDEAS.
- Amateurish.
  - Requires profound knowlege of subject.
- Self-contained.
  - Approach is multidisciplinary.

# Aims

- Understand creative process.

# Aims

- Understand creative process.
- Understand rôle of society.

# Aims

- Understand creative process.
- Understand rôle of society.
  - Scientist as a « child » of his times.

# Aims

- Understand creative process.
- Understand rôle of society.
  - Scientist as a « child » of his times.
- Understand OUR rôle in our society.

# What is there to learn?

- Investment counts.

# What is there to learn?

- Investment counts.
- Collective work.

# History of Science

A vibrant, multi-colored nebula with red, blue, and white clouds and numerous bright stars. The central region is a bright, orange-yellow cluster of stars, surrounded by swirling clouds of gas and dust. The colors transition from deep red on the left to bright blue and white on the right, with a central orange-yellow core. The background is dark, filled with many smaller, bright stars of various colors.

Thank you!
